GainSeeker® Suite Training Course:

## DMS Chart Types and Statistical Options

### Maximizing value

The *GainSeeker DMS Chart Types and Chart Options* class takes a detailed look at each of the DMS charts offered in GainSeeker. Participants will become more familiar with the available charts and the different charting options offered to them. Afterwards, participants can use the knowledge gained in this course to more fully utilize the charting capabilities in GainSeeker to better analyze your defect data.

### Course content

*DMS Chart Types and Chart Options* addresses the following topics:

- Interpreting DMS data using the different charts available in GainSeeker
- Changing options available for specific charts
- Customizing chart statistical options
- Reviewing the different costing options available for determining the cost of defects

### Who should attend

Recommended attendees:

- System Administration / Technical Lead
- Data Analysis

### Prerequisites for this course

Recommended:

- Intermediate DMS Charting

### Course duration

1 hour

### Scheduling
